CARAVAN

PASSENGER CONVERSION: WINDOW KIT

FAA/PMA Approved (STC SA00154AT)

This STC is applicable on Cessna 208, 208A and 208B

ENHANCE PASSENGERS' POINT OF VIEW

The addition of windows gives the Caravan cargo version the look and feel of a real passenger aircraft. The STC allows the installation of up to 12 windows, six on each side of the aircraft. The window locations are similar to those used by Cessna on its factory built Caravan Passenger version.

Window installation is made easier and more efficient by using a special routing guide and backing plate that helps ensure proper placement and cutting. The windows and trim panels are manufactured in-house to the highest aircraft standards.

For more information, please contact John Ackerman at 336.497.5517 or Jacqueline Biondi at 336.497.5529
